Florida Oceanographic Society's mission is to inspire the conservation of Florida's coastal ecosystems through education, research and advocacy.

Your annual support through partnerships helps us:

- Inspire a new generation through educational programming and outreaches.
- Provide quality care for over 750 animal ambassadors at the Coastal Center, including 3 non-releasable sea turtles.
- Advance conservation and restoration science with ongoing research projects on seagrass and oysters in our local waters.
- Fight for Florida's waterways by advocating for legislation that protects our environment and meeting with constituents and government officials.

Learn more at FloridaOcean.org
